

## SPELLING STUDY

List your 20 words in a column on the left side of a piece of lined paper. Have an adult check to be sure that your list is correctly spelled.

### LOOK

Look at the first spelling word. Say it out loud. *Really* look at it. Give that word at least ten seconds of your complete attention.

Write it on a piece of scratch paper or, if you know sign language, sign each letter to yourself.

Consider how it would be pronounced if it were pronounced the way it is spelled.

Do you see any smaller words within it?

Notice anything about it that might help you remember how to spell it.

### COVER

Fold the left margin over the list so that you cannot see the words. Close your eyes and visualize what the word looks like. See each letter in your mind, from the first letter to the last.

If you cannot see the word in you mind, go back to step one and look at the word again. Do this as many times as you need to. Concentrate on learning the word.

### WRITE

With the left margin folded over the spelling list, write the word that you just studied.

### CHECK

Check what you wrote and compare it to the correct spelling. Be sure to check each letter carefully.

If you spelled the word right, go the next word on the list.

If you misspelled the word, figure out what part of the word you had trouble with. Then cover the words again, and try to write the word correctly again.

### TAKE THE TEST

When you can spell all the words correctly, ask an adult to give you the test on your list.
